

REGIONAL DISTRICT OF MOUNT WADDINGTON 2015 CLIMATE ACTION SUMMARY REPORT

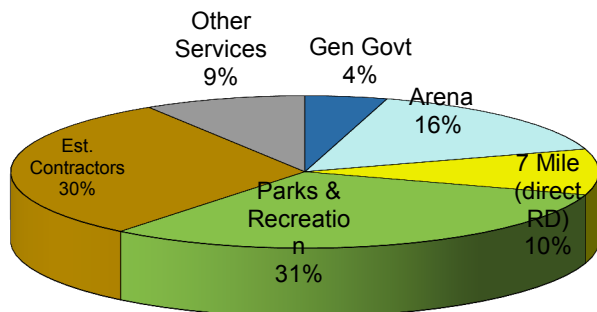

Highlights:

- Operational emissions reduced 12% from 2014; 32% since 2011, to **131 tonnes CO₂e**
- Includes 25 tonnes direct reduction from Chilton Regional Arena heat recovery project with SD85
- Hydro is the main source of energy for RDMW operations while propane remains the largest source of CO₂ emissions
- Offset by 7 Mile Biocover project which reduced emissions by 970 tonnes CO₂e
 - this was applied to make RDMW carbon neutral and distributed remaining 839 tonnes CO₂e to member municipalities (557 T) and banked for First Nations (149T) and the RDMW (134)
 - to the end of 2015, 390 T CO₂e has been banked on behalf of participating First Nations and another 351 T for future use for the RDMW operations

RDMW Operational Carbon Footprint, 2009-2015

2015 RDMW Carbon Footprint By Service Total = 131 tonnes

2015 RDMW Carbon Emissions Sources
