Consumer product recall

Calico Critters accessories recalled due to potential choking hazard

Last updated: 2023-03-09

Summary

Product: Pacifier and bottle accessories sold with Calico Critters Flocked Animal Figures

Issue: Consumer products - Choking hazard

What to do: Immediately stop using the recalled product and contact Epoch Everlasting Play LLC for a free replacement.

Affected products

This recall involves pacifier and bottle accessories sold with Calico Critters Flocked Animal Figures. The pacifier and bottle accessories measure approximately 1.07 cm (0.42 inches) long and 1.90 cm (0.75 inches) long, respectively. The pacifier accessories were sold in yellow, orange, pink, dark pink, blue and teal colours. The bottle accessories were sold in yellow, pink, blue and orange colours. One style of the bottle has two yellow handles.

The bottle and pacifier accessories were sold with the following products listed by item number. This item number is printed on the bottom of the product packaging. The recall does not include item numbers listed below which were sold with accessories other than the pacifier and bottle accessories; only the bottle and pacifier accessories are being recalled.

Issue

The bottle and pacifier accessories pose a potential choking hazard to children under 3 years of age. The packaging of the product is labelled for ages 3+ and cautions that it contains small parts which are not suitable for children under 3 years.

As of March 3, 2023, the company has received no reports of incidents or injuries in Canada. In the United States, the company has received 2 reports of choking incidents, including one death of a child due to choking on an accessory.

What you should do

Consumers should immediately stop using the recalled product and contact Epoch Everlasting Play LLC for a free replacement accessory.

For more information, consumers can contact Epoch Everlasting Play LLC by telephone at 1-800-631-1272, Monday to Friday from 9am to 5pm ET, by email at productsafety@epocheverlastingplay.com or visit the [company website](#).

Joint recall with Health Canada, the United States Consumer Product Safety Commission (US CPSC) and Epoch Everlasting Play LLC.

Please note that the *Canada Consumer Product Safety Act* prohibits recalled products from being redistributed, sold or even given away in Canada.

Health Canada would like to remind Canadians to report any health or safety incidents related to the use of this product or any other consumer product or cosmetic by filling out the [Consumer Product Incident Report Form](#).

This recall is also posted on the [OECD Global Portal on Product Recalls website](#). You can visit this site for more information on other international consumer product recalls.

Budget 2024 Consultation

On behalf of the Select Standing Committee on Finance and Government Services, we are writing to share information about the provincial **Budget 2024 Consultation**. We would appreciate your assistance in encouraging British Columbians to participate.

As the Committee hopes to hear from British Columbians in all areas of the province, the Committee kindly requests Regional Districts share information about the consultation with area representatives and the public in their region through community bulletin boards, newsletters or social media platforms if the opportunity allows. Promotional materials and a news release are available for download on the [Budget 2024 Consultation website](#) and we would be pleased to send you materials in different formats if desired.

The Committee will be holding several public meetings to hear from British Columbians about their priorities for the next provincial budget. Public meetings are anticipated to take place in late May and June and will be a mix of in-person and virtual (video/teleconference) meetings. The Committee expects to hold in-person meetings in the following communities:

- Campbell River
- Kitimat
- Dawson Creek
- Prince George
- Revelstoke
- Cranbrook
- Penticton
- Vancouver
- Abbotsford
- Victoria
- Richmond

British Columbians wishing to speak to the Committee at a public meeting are asked to complete a request form by **Thursday, March 30 at 2:00 p.m. (Pacific)** on the [Budget 2024 Consultation website](#).

The opportunity to provide written input to the Committee will also be available beginning in late May.

If you have any questions about the Budget 2024 Consultation, the Committee's work or the information in this email, please contact us by email at FinanceCommittee@leg.bc.ca or phone at 250-356-2933 or 1-877-428-8337 (toll-free in BC).

Island Health achieves Accreditation Canada seal of approval

Island-wide — Island Health has been recognized by Accreditation Canada for going beyond nationally recognized standards for excellence in delivering services focused on improving the quality, safety and experience for patients, their families and staff.

“I am so proud of our staff and medical staff who continually strive for learning and improvement,” said Leah Hollins, Island Health Board Chair. “Achieving the Accreditation Canada seal means that the patients we serve and their families can be assured that we are working hard to meet our standards of delivering safe, high-quality care, and it validates the excellent work our teams are doing. Being accredited demonstrates our commitment to improving quality, reducing risk and strengthening accountability.”

Accreditation is a rigorous evaluation process that assesses an organization against global standards of excellence to identify what is being done well and what needs improvement. In November 2022, Accreditation Canada surveyors visited Island Health sites from Victoria to Courtenay to meet with staff and medical staff, patients and their families, volunteers and community partners to gain knowledge of Island Health’s systems of care delivery.

Surveyors conducted a comprehensive assessment of 18 of Island Health’s programs to identify what is being done well and what can be improved to ensure Island Health is providing the best possible care and services to the patients and clients we serve.

“We are constantly on a quality improvement journey,” said Kathy MacNeil, Island Health President and CEO. “We know better quality means better patient outcomes. The accreditation process is a wonderful opportunity to showcase the high standards we are achieving every day and also to receive feedback on where we should be focusing our efforts for improvement.”

Accreditation is just one milestone in Island Health’s commitment to quality improvement in support of the work that staff and medical staff do every day to provide excellent health and care for everyone, everywhere, every time.

“We always need to be looking for ways to improve health care, while ensuring that the patient’s needs are met effectively, in a consistent and caring way, without delay,” said Eric Gubby, a Patient Partner who volunteers with Island Health to provide feedback from a patient’s perspective. “I believe that including patients as active participants in health care development is the best way to ensure that our perspective gets factored into the delivery process. Our participation in the accreditation survey allowed us to provide valuable feedback on our experiences as Patient Partners in interfacing with health-care partners.”

Accreditation is an annual assessment process that evaluates a select number of Island Health programs and services each year. The next visit by Accreditation Canada surveyors will take place in fall 2023 to evaluate acute care programs and services.

Backgrounder:

Accreditation Canada is an independent organization that assesses health care organizations in Canada and around the world against evidence-based standards. Surveyors review questionnaires and conduct site visits to assess the work environment, leadership, governance functioning and clinical programs and services against other peer organizations in Canada and throughout the world.

Island Health programs evaluated in 2022 by Accreditation Canada for Service Excellence Standards:

- Ambulatory care
- Palliative home care
- Primary care
- Long-term care
- Community-based mental health, including substance-use services

Island Health programs evaluated by Accreditation Canada for System Excellence Standards:

- Infection prevention and control
- Medication management
- Governance standard
- Leadership (including the following priority processes):
 - Communications
 - Emergency preparedness
 - Patient flow
 - Patient and family-centred care
 - Human capital
 - Integrated quality management
 - Medical devices & equipment
 - Planning and service design
 - Physical environment
 - Principle-based care and decision making
 - Resource management

About Island Health:

Island Health provides health care and support services to more than 860,000 people on Vancouver Island, the islands in the Salish Sea and the Johnstone Strait, and mainland communities north of Powell River. With more than 27,000 staff and over 2,900 physician partners, 1,000 volunteers, and the dedicated support of foundations and auxiliaries, Island Health delivers a broad range of health services, including: public health services, primary health care, home and community care, mental health and addictions services, acute care in hospitals, and much more across a huge, geographically diverse region.

NEWS RELEASE

FOR IMMEDIATE RELEASE

March 14, 2023

Action taken to strengthen North Vancouver Island health care

North Vancouver Island — After the Province announced a \$30 million investment in health-care services in North Vancouver Island on January 27, Island Health and its partners have made significant progress in implementing the actions designed to improve and stabilize health-care services for the region.

“North Vancouver Island residents are quickly benefitting from Island Health’s improvements, especially by attracting and recruiting health-care professionals from across the province, country and beyond. Their progress is commendable and makes health care more accessible to Island residents closer to home,” said Adrian Dix, Minister of Health.

Island Health has hired new staff to support the health system in the north Island. In addition, Island Health anticipates delivering over \$280,000 in quarterly retention bonuses to more than 200 current employees in the first quarter of the program, with eligible staff already receiving enhanced travel compensation.

“I want to thank all of the people who are actively working to bring health care service improvements to the residents of North Island. The \$30 million investment will help to bring more stability and improved health care for the communities,” said Michele Babchuk, MLA for North Island.

With the purchasing of a new CT scanner well under way, local residents will benefit from drastically reduced travel times to access the health services they need.

“Island Health is committed to sharing updates as we move forward on this priority work,” said James Hanson, Island Health Vice-President, Central/North Island clinical operations. “We have established a task force that includes leaders from multiple teams whose focus is to ensure our patients and care providers realize the benefits of these investments as quickly as possible. I’m proud of what the team has accomplished already.”

Island Health has added two additional long-term care beds at Eagle Ridge Manor and increased services and residential capacity in the Port Hardy community by 10% to better support seniors requiring long-term care.

“Knowing that government heard our requests for funding and listened to the recommendations that came from a health summit, facilitated by the Rural Coordination Center of BC in November 2022, about strengthening services in the North Vancouver Island area is so meaningful,” said

Port Hardy Mayor Pat Corbett-Labatt. “For example, the expansion of the Salvation Army sobering, assessment and sheltering program is an amazing win for vulnerable people in our community and will help reduce visits to the hospital’s emergency department.”

Supported by a robust national recruitment campaign (#northvancouverislandcareers), Island Health is actively recruiting and targeting a broad range of potential new hires in North Vancouver Island, as well as a variety of professionals across Vancouver Island, British Columbia, Canada and the world. Since launching, over 1,000 prospective candidates have been engaged, including many nurses that have shown interest in one or more opportunities within Island Health. Eighteen candidates have accepted job offers in the North Vancouver Island region, including two nurses who have chosen to relocate from outside the North Vancouver Island region and will be starting work in the coming weeks.

Action has been taken to expand sobering, assessment and sheltering services currently offered by the Salvation Army, an Island Health contracted services provider. The Salvation Army operates a 6-space sheltering, sobering and assessment program in Port Hardy with support from Island Health’s mental health and substance use team, BC Housing, the District of Port Hardy and the Mt. Waddington Regional District. Thanks to the government’s investment, work has commenced to add six new sobering spaces and expand services to be available 24 hours per day, seven days per week.

“Historically, we have offered sheltering services from late afternoon to early morning, so people who are using these services have to find somewhere to go during the day and on weekends when the centre is closed,” said Michael Winter, Community Ministries Supervisor, Salvation Army Centre of Hope. “Expanding these vital services to be available around the clock for North Vancouver Island residents will offer more stability and long-term health and care for the individuals and families we serve.”

Learn more about the Port Hardy Salvation Army Centre of Hope and the value of these services in the video found [here](#).

“I’m very excited and grateful to the Minister of Health for recognizing the significance of health-care services in North Vancouver Island,” said Port McNeill Mayor James Furney. “Everyone has a seat at this table, and our partnerships will play an essential role as we work together to ensure that these investments benefit all residents and Island Health staff working in this region.”

Quick Facts:

- Three Registered Nurses/Registered Psychiatric Nurses hired (currently engaged and working 12 qualified candidates through recruitment and selection process, including five in the interview stage).
- One Licensed Practical Nurse hired and two in the interview stage.
- One community professional hired into home care and public health (Five qualified candidates in the interview and offer stages).
- Seven support staff hired (includes ambassadors, nursing assistants and health care support workers).
- One Protection Services Officer hired (currently engaged and working four candidates through recruitment and selection process including one in the offer stage).
- Two full time and two casual Inter-facility Porters for dedicated shuttle service hired (offers extended for two additional positions).

Mount Waddington Regional District welcomes ocean plastic depot

By **Justin Waddell**

Wednesday, Feb. 1st, 2023

(Supplied by Ocean Legacy Foundation)

Debris from the shoreline, ocean and industrial cleanups can now be collected and sorted at a new depot.

The new ocean plastic depot is located at 7 Mile Landfill and Recycling Centre on Highway 19 between Port McNeill and the Port Alice junction. It is now accepting materials like abandoned, lost and discarded fishing gear, marine debris, netting, rope, styrofoam, hard plastic and some buoys.

The materials are sent to the Ocean Legacy processing centre at Steveston Harbour, B.C., where it is further sorted, cleaned and recycled.

Opened through a partnership with Ocean Legacy Foundation, Mount Waddington Regional District chair Andrew Hory says the facility will help benefit the community and its surroundings.

“We are really excited about our partnership with Ocean Legacy and the creation of the ocean plastics depot at 7 Mile Landfill,” said Hory.

“This program enables the [district] to build on our collection and recycling efforts by adding ocean plastics to the list. Removing plastic wastes from our oceans and shorelines, then collecting them locally, directly benefits the environmental health of our community.”

Executive director of Ocean Legacy Foundation Chloé Dubois says the development will add to their capabilities to process materials.

“Ocean Legacy is excited to launch this opportunity to reduce the pollution in our coastal communities and protect our precious marine environments,” said Dubois.

“This development continues to enhance our growing capacity to capture wasted plastics, divert them from landfills, and repurpose the materials in a way that fuels innovative manufacturing technologies, which support the Canadian plastic circular economy.”

The depot is the fourth of its kind in B.C., with others located in Powell River, Ucluelet and Cumberland. They add more are under development in Prince Rupert and the Lower Sunshine Coast.

Ocean Legacy says the program forms a part of its national strategy in addressing plastic pollution.
